Composites World

Our Mission

Our Mission is to provide access of vast potential of supplier capabilities available across the world to our partners, customer's procurement & engineering team. While making customers life easy, we will continue to create enjoyable & profitable atmosphere for our customers, employees, stakeholders and contribute towards betterment of society.

Quality Policy

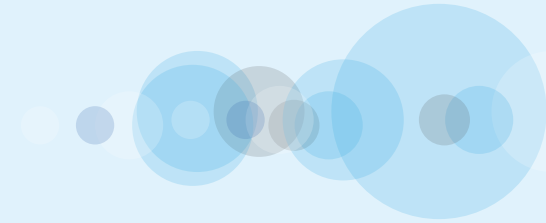

YOTO shall consistently deliver high quality products & services to meet customer expectations. YOTO will establish high performing quality management systems with clear focus on continual improvement culture, to make customer happy and meet stakeholders expectations.

We exist Because of our Customers

Core Values...

is the way of life for us

Honesty, Integrity and Ethical Behaviour

We shall be a company that behaves with the highest standards of honesty and ethical behaviour. We shall be straight forward in all our communication within and outside the company, and ensure that everyone in our organisation acts with integrity & honesty.

Making Things Happen

We make things happens through a "Whatever It Takes" attitude by taking responsibility for our actions and providing solutions to problems.

Continuous Improvement

We make mistakes and we learn from our mistakes now rather than later. Through learning we improve and innovate our internal processes and systems, as well as products and services to ensure our clients' bear desirable results & success.

Rewarding Success

Success is measured by the results achieved. The people rewarded then are those that take action and achieve the desired results.

Passion & Fun

We love what we do and are passionate about it. We enjoy and have fun in our work place.

Sourcing Experts...

Our Experience of Low Cost Sourcing...

Global sourcing and procurement today is strategic essential skill and tool, which is serious option considered by Sourcing and Procurement leaders.

A number of marketplaces are on the rise as global sourcing contenders, Apart from China and India as most common market places, relatively newer ones like Cambodia, Vietnam, Thailand, Myanmar and the Philippines are gaining importance.

Each of these region have their expertise and challenges , some time they offer even lower labour and energy rates, and equally efficient production mechanisms. Suppliers in the emerging economies of Southeast Asia are offering services for businesses of all sizes. As a result, the probability of gaining better volumes with lower prices has increased.

At YOTO SOURCE we harness supply base capacities and capabilities across the world and offer solution to our customer as one stop shop.

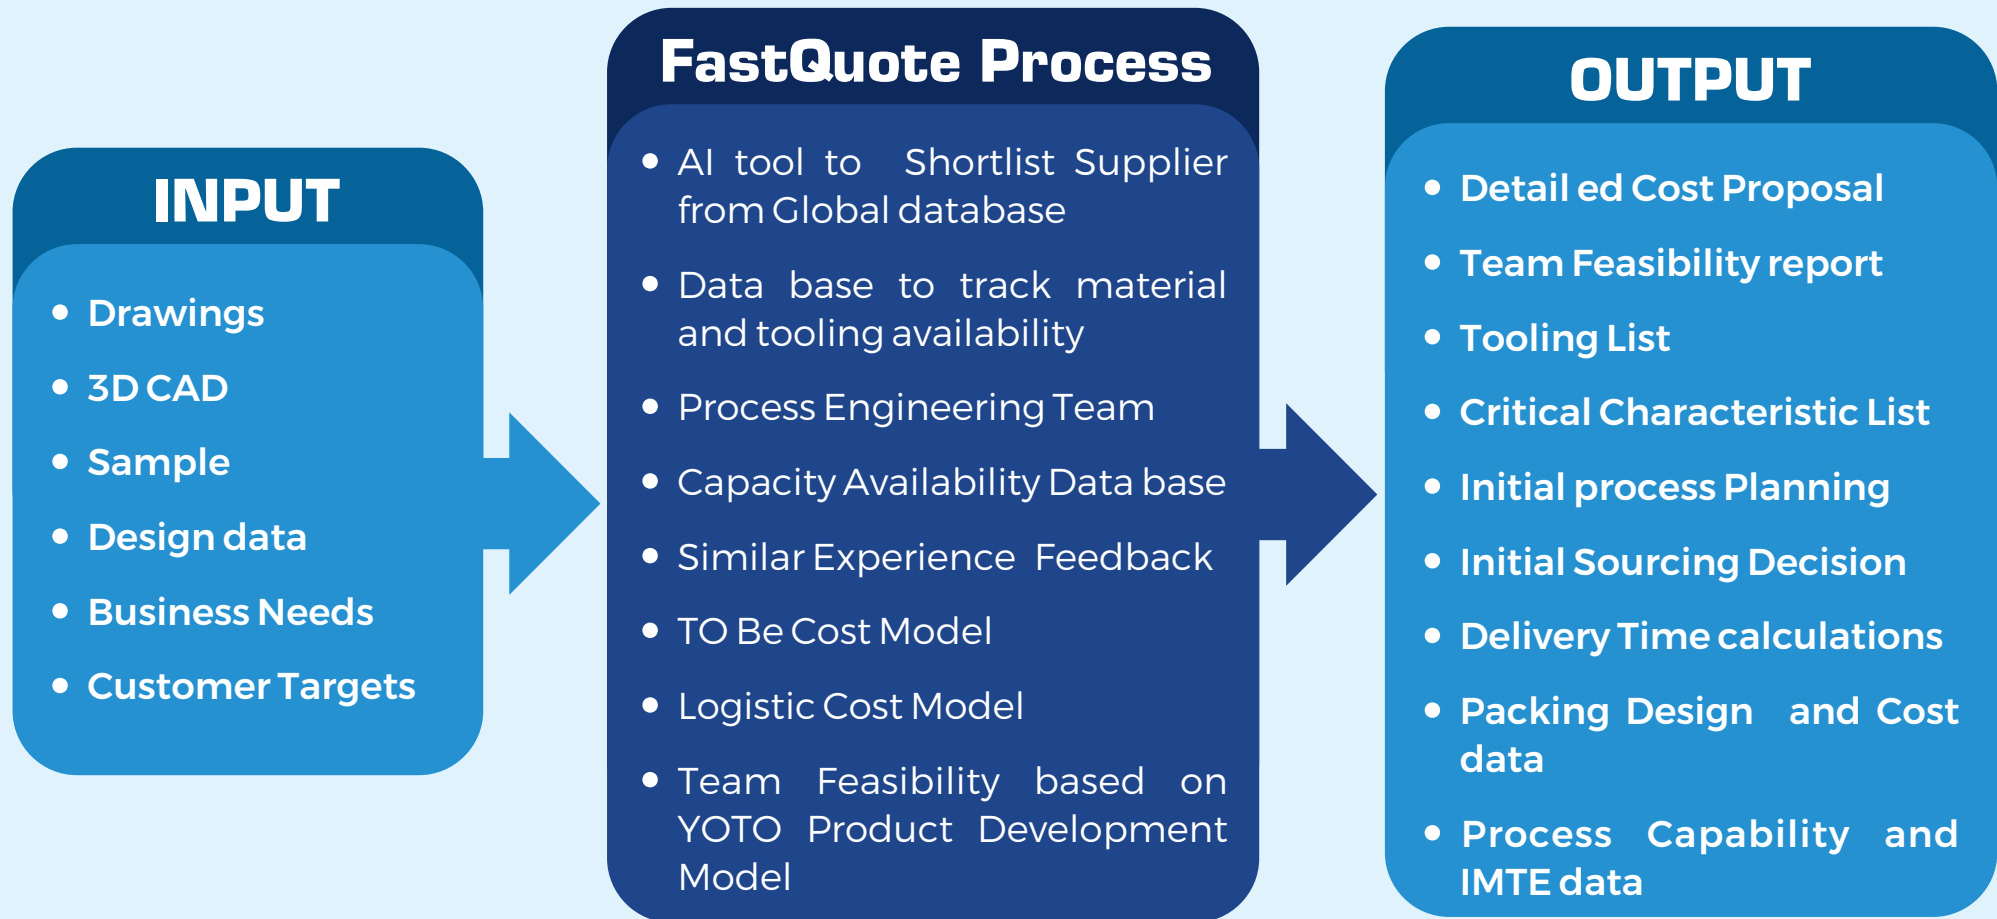

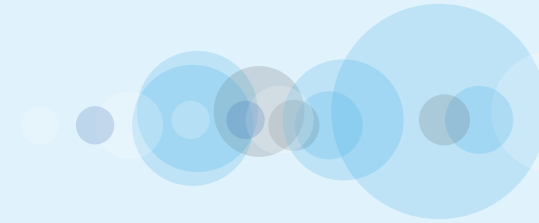

Goal is to make customer's life easy, we bring value by our global delivery capabilities and thus make cost effective solution for customer.

With our large supplier base, visibility across the market segment and versatile team, we are able to offer alternative option, ready - speedy solution for new product development and thus contribute towards business need of SPEED to MARKET.

Quality Engineering And Supplier Technical Assistance

With our expertise and resources in low cost region especially in India, China and South Asia, we offer special supplier management services to customer's existing suppliers in the region. These services are charged on daily basis.

These services are focused on customer's convenience and ease of doing business in this region. We have pool of quality experts who can walk through your suppliers site and help you to give objective feedback and participate in product, process and system quality verification and audits.

These focused services include

- Product Audits • Process Audits • Quality System Audit • Compliance to Customer's quality System • Supplier Evaluation on Safety, Quality, Cost, Management and technology parameters • Supplier Quality Improvement programs • APQP and PPAP document verification • SPC and MSA studies at supplier end

Our Resources

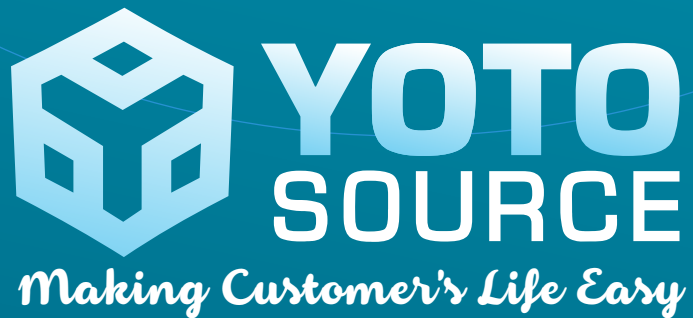

We have more than 25 supplier quality engineers and industry experts to provide quality services in this area. Team is supported with world class inspection and meteorology laboratory across the region. Team is continuously trained in latest quality tools and fundamental quality processes.

Cost of Services

- These are standard services and cost based on per man day rate of US\$150 • In addition to this local travel (in country) cost at actuals • Hotel cost is billed @ US\$150 / day if needed.

Before start of the project commercial proposal is sent along with all details for approval to the customer and only after formal approval assignment is started.

Confidentiality - Yoto Source is committed to sign off customer non-disclosure and confidentiality agreement and with highest ethical standard we conduct our business.
